SHERIFF – NEW JAIL

Sheriff Jerry Colson and Randy Shinkle of the Sheriff's Office, County Civil Attorney Tom Thompson, Dale Gaines and Richard Little of Generac, Charlie VanOver of Plan One, and Gary Olson of LM Olson Construction discussed a malfunctioning generator at the new jail, stating that upon startup, the generator gives out exhaust which is entering the jail and administration area through air intakes.

Mr. Olson reported that the condition was known in September but the problem was not corrected at that time. He stated that the generator performs a weekly test without any load and that tests have not been performed with a load on the generator which are thought would reduce the amount of exhaust. Various possible malfunctioning parts have been tested and replaced but Mr. Olson stated he could not verify at this time whether or not the issue was fixed and requested to monitor the situation until the Board's January 3, 2006 meeting and report at that time.

Commissioner Meacham asked where the original drawings show the generator to be placed. Mr. Olson replied that prior to bidding, the generator was to be placed on the southeast side of the building. After review by the engineers, the location of the generator was moved to the current location partially due to the fact that is where the power utility was installed.

Mr. Gaines and Mr. Little reported that the intakes for the air conditioning system and kitchen area are pulling the exhaust into the building. The men feel that no matter where the generator is, by the time the exhaust is taken into the building, it is not harmful to any occupants as the outside air dilutes it.

Tom Thompson stated, and the Board agreed, that the county will have zero tolerance for any exhaust being pulled into the building.

Mr. Shinkle asked the Board to also consider the fact that the generator currently sits 60 plus feet from the building. If an additional housing unit were built in the future, the generator would sit much closer to the building.

Chairman Zeiger questioned if vertically directing the exhaust to carry it past the building is an option. Mr. Gaines and Mr. Little stated that is a possibility that can be explored further. Chairman Zeiger also stated that he feels since the county purchased a new generator, he would rather see a new one to replace it rather than repairing it. Mr. Olson stated that he feels the current generator can be fully repaired and can be made to operate at its optimal performance.

Mr. Olson would like to first repair the generator to run within the parameters the manufacturer sets, then if there is still an exhaust problem, he suggests moving the it. He would also like to discuss with the manufacturer the possibility of an extended warranty on the current generator and he would like to prepare a cost estimate for a possible move.

Tom Thompson asked if, after the generator is fixed to run at its optimal performance, air tests and samples could be taken inside the air intake ducts and inside the building to

verify levels of exhaust entering.

The Board directed Mr. Olson to have the generator be fixed to run at its optimal performance, have the necessary air tests performed, and report back with results and cost estimates to move the generator.

ADJOURNMENT

There being no further business, Chairman Zeiger adjourned the meeting at 10:00 p.m.
